

Introducing the World's Most Advanced CH-47 Internally Air Transportable Infantry Squad Vehicle

The Flyer® 72 Light Duty Vehicle (LD) is a lightweight variant of the M1288 GMV 1.1 and XM1297 Army Ground Mobility Vehicle (AGMV) both currently in operational use.

The Flyer® LD has a low 5,000 lb VCW, which allows for full mission flexibility of high hot UH-60 sling load and unmatched payload capability of 5,000 lb with no kit and 8,000 lb with kit achieving an unparalleled 1.6:1 payload to curb weight ratio.

The Flyer® LD retains the same mobility, maneuverability and reliability of the GMV 1.1 and Army GMV variants leveraging 95% commonality of components.

Like all our Flyer® 72 variants, the LD is purpose built to reliably operate in severe, rugged and restrictive terrain, in all weather conditions.
