Drakensberg Truck Manufactures is a privately owned South African armoured vehicles company, specializing in the design and manufacture of armoured and landmine protected vehicles, as well as the refurbishing and maintenance of ex-military vehicles. DTM was established in 1986 and is situated in Pretoria, utilizing combined management experience of more than 75 years in this specialized field.

When production of the Casspir family decreased and eventually came to a standstill in 1994, there were various private initiatives in die industry to build Casspir-like vehicles. Drakensberg Truck Manufacturers saw the need in the market to build a smaller vehicle with similar capabilities as the Casspir, and took this opportunity to design and manufacture the ultimate replacement vehicle. Hence the Springbuck® APC was born.

The Springbuck® APC, which derived its name from the antelope known for its toughness and sure-footed dexterity, is owned in its design and entirety by DTM.

The basic Springbuck® APC concept design started in 2001. After extensive research and automotive and ballistic testing the Springbuck® MkI APC was manufactured by Drakensberg Truck Manufacturers (DTM). Since then the vehicle has been upgraded to the Springbuck® MkII, MkIII, MKIV 4-cylinder 1-door, and more recently to the Springbuck® MKVI 6-cylinder 3-door.

The Springbuck® range of armoured personnel carriers are designed for ease of operation and repair, using internationally available drive-line components for assured reliability as well as availability of parts. This permanent 4x4 vehicle not only boast exceptional manoeuvrability but with its powerful MWM engine also handles effortlessly on the open road. Special attention has been given to the ergonomics of the driver and its 10 passengers. With a ballistic protection of B6 upgradeable to B7, the all-steel armoured v-shaped monocoque hull is designed to withstand a TM57 landmine under the hull or two under any wheel. The standard Springbuck® APC configuration can be easily adapted to various applications and by the addition of turret-mounted weaponry can be effectively used as a combat vehicle.

Our vehicles have successfully been used for various peace keeping applications throughout the African continent and abroad.
